ScanWAN

Mobile application registering IoT nodes

EL YANDOUZI - CAMBUS - JULIENNE

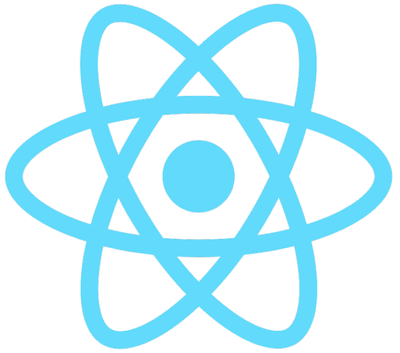
The purpose of the project

An efficient mobile application to ease the registration of IoT nodes

LoRa Alliance™

Development of the application

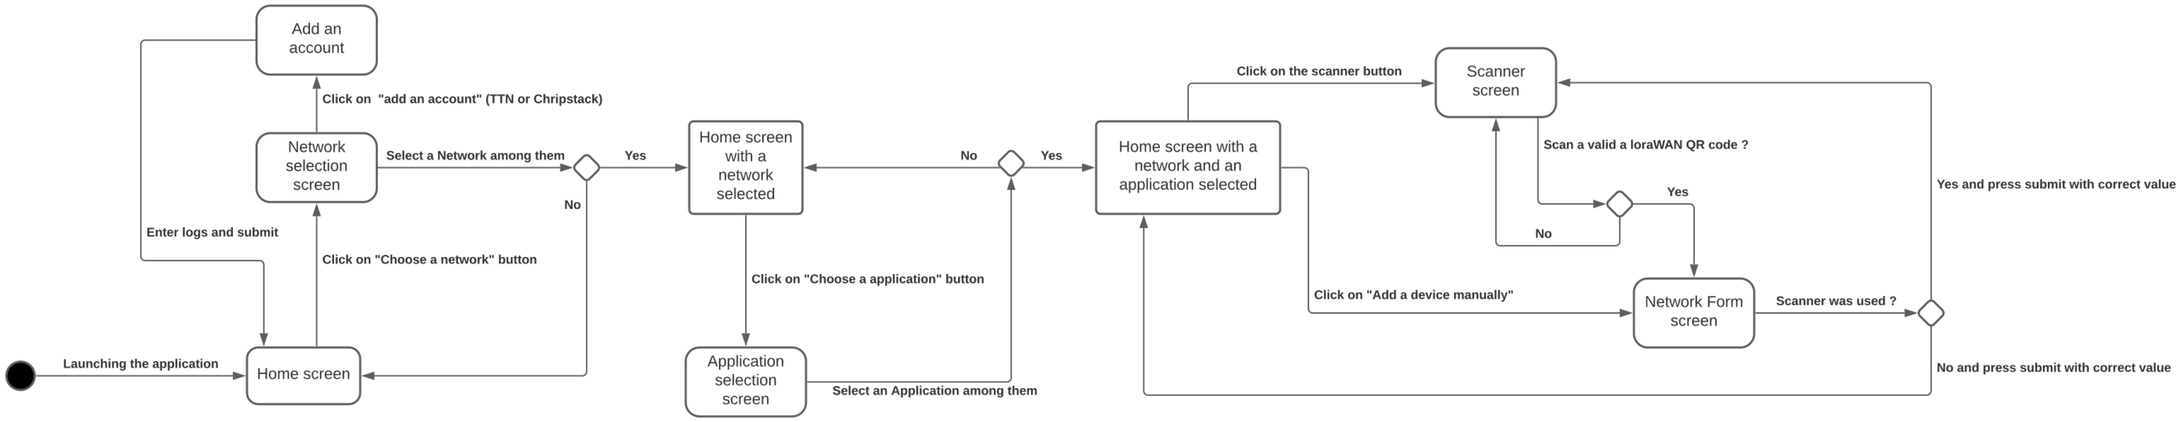
Cross-platform framework



Frontend & Backend

A minimalistic interface for 100% functional application

Sequence diagram



Issues & Solutions

From API call to iOS Compilation

What about the future ?

Take charge of other networks, OCR, additional fields
